SCALABLE

DEDICATED CONNECTION

LEVERAGE CLOUD SOLUTIONS

Cloud Connect

POWERED BY **ICN**

Our Cloud Connect service offers a private, direct, and secure transport connection to cloud/content providers that does not travel across the public Internet.

With accessibility to multiple Internet Exchange Points, ICN brings our network edge closer to content providers: AWS, Google, Microsoft, Oracle, and more.

Our service provides customers with low latency, improved network performance, and increased redundancy.

PROVIDING A SECURE, PRIVATE CONNECTION TO A CLOUD SERVICE PLATFORM

Low Latency
Experience faster transfer times and reliability of services. Application performance improves with private, direct connections.

Dedicated Bandwidth
Receive a dedicated, private transport connection to a cloud provider. This private connection gives our users the ability to by-pass the public Internet. With our direct transport connection, the chance of security threats also decreases.

Scalability
Connect physical and virtual infrastructure by adding and reducing bandwidth in order to meet demand and manage costs.

Adding transport connectivity for your cloud application needs.
- Archiving / Storage
- Application Integration
- Hybrid Cloud Architectures
- Mobile Services
- Internet of Things (IoT)
- Security and Compliance
