

ANALOG COMPATIBLE
POTS ALTERNATIVE
RELIABLE CONNECTIONS

EPIK

GRANITE

Let ICN deliver a reliable Ethernet/cellular option using Granite's EPIK solution. Avoid unexpected rate increases or failing facilities that come with outdated 1FB and POTS services. Trust ICN and Granite to ensure your elevators, fire alarm panels, and security systems stay connected.

The EPIK solution features a choice of wired Ethernet or cellular connections (dual SIM cards), as the primary network connectivity. The solution integrates automatic failover and battery backup for your critical services.

ICN has partnered with Granite Telecommunications to deliver this advanced technology solution throughout the State of Iowa.

EPIK, GRANITE

LET ICN AND GRANITE DELIVER A STABLE AND COMPATIBLE ETHERNET/CELLULAR SOLUTION.

Granite's EPIK device is adaptable based on the customer's network preferences and needs.

Network Placement

The device can be placed in a variety of locations within the customer's provided network, including at the edge of the network outside of the firewall, inside or outside the firewall perimeters, or inside the firewall VLAN.

Compatible

Works with virtually all existing analog line devices like alarms, faxes, POS systems, elevators, and legacy modems.

Compliant

This solution is fire and building code compliant (NFPA 72 & MFVN), along with PCI and HIPAA compliant.

Monitor/Report & Support

Instant notifications are available via text, email, or call. Our Network Operations Center (NOC) provides support 24/7/365.
