

See. Hear. Talk. Share.

*ICN IP Video@LightSpeed*TM

Collaborate through video interaction with ICN's video conferencing service. IP Video@LightSpeedTM (V@LS) is compatible with industry standard H.323 IP video codec and equipment. Experience the high video quality within a flexible room layout with open microphones and high definition cameras.

- Sessions can be unscheduled (ad hoc) or scheduled using ICN's Video Operating Scheduling System (VOSS).
- Choose point-to-point or multipoint sessions.
- Flat rate, no hourly usage for standard service.
- Bridges multiple IP video sites.
- Bridges legacy ICN MPEG video rooms with gateway.
- Bridges ISDN video rooms with gateway.
- Access to "guest" or out-of-network sites available. (Some restrictions may apply.)
- Uses 5 Mbps circuit on private ICN intranet.
- Optional public Internet access available.
- Video Border Proxy (VBP) provides application layer gateway security.
- Technical design assistance with customer's room integrator or technical team.
- Software and provisioning updates for ICN managed video endpoints.
- Break and fix maintenance for ICN managed video endpoints.
- 24 hours, 7 days per week, 365 days per year telephone support.
- Video codecs are placed in the same room as display, microphones, and speakers.
- Universal Service Administrative Company (USAC) E-rate eligible services.
- Electronic billing and reporting.
- Standard definition video starts at only \$207 monthly.

The Iowa Communications Network (ICN), a State of Iowa government agency, provides voice, video, data and Internet services to authorized users in all 99 counties.
