Question 1) Is there a CO option to submit for rock or is a contingency in the bid preferred? Is a bridge attachment an option to cross the river on page 16?

Answer 1) Contractor can provide a "Rock Bore" price per foot as defined on the SOW document. Not anticipating any but it is possible for the region.

A bridge attachment was considered, but due to the age of the bridge and existing soil wash outs at the bridge abutments it was decided not to do a bridge attachment. DOT River cross sections were provided and it is the responsibility of the contractor to review existing conditions.
