Voice

POWERED BY ICN

ICN's Managed Voice Service (MVS) is an IP platform that is hosted from a cloud environment. This advanced voice system includes hardware and licenses while offering premium and professional support from our voice and data experts for service management and technical configurations.

ICN has partnered with CenturyLink to provide our managed VoIP solution. This collaboration provides ICN users with a state-of-the-art telecommunications system, bundled with the additional voice efficiency and productivity enhancements of unified communications.

VOICE

OUR PREMIERE VOICE SERVICE COMES WITH STRONG BENEFITS

Predictable Billing

ICN's predictable fixed cost model offers advanced managed voice service to users with \$0 capital investment. The monthly cost of each seat is all you pay to stay up-to-date with the most advanced voice service available.

Redundancy

Our cloud VoIP managed service is a fully redundant instance of CenturyLink Broadworks BroadSoft feature server platform. VoIP enables people to use the Internet as the transmission medium for telephone calls by sending voice data in packets using IP rather than by traditional circuit transmissions of the public switched telephone network.

Free Long Distance

The standard and premium seats have in-bound and out-bound long distance included.

International long distance not included.

No Contracts

You don't have to worry about purchasing PBX equipment, licenses, internal or external support or other components and there are no contracts.

Customer is responsible for wiring.
