

# Deciphering VOSS

**Node** - Each site is assigned a three-digit number as an identifier. This is referred to as the “node number” and is found at the beginning of the Site ID information.

Sites are listed alphabetically by location – then type. A number after the “type” indicates multiple ICN classrooms at that location.

## Other Information to Know

**All** sites have interactive audio and video; however, not all sites can originate sessions.

**REMOTE ONLY** – Site does not have the capability to originate sessions.

**TEST** – These sites are not an option to request for sessions.

**CART** – The monitors for incoming and outgoing video are located side-by-side on a cart. There is no presenter podium, but some have the capability of originating, if that request was made when the site was built.

\* – An asterisk by a site location indicates that the site is an “Approval Required Site,” which means they can reject requests.

**INTERFACE, CIRCUIT ONLY, T-1, MPEG** – These are not classrooms, but are types of circuit connections used to bridge the ICN system to another system.

**ON DEMAND** – The 24-hour period prior to the start time of a scheduled session OR a new request to join a session for which the requester has secured permission from all sites. Call 725-4686 or 877-575-2862, which are answered 24/7.
